

COVID HACKS Field Test

3rd Grade PRE-assessment PDF Scantron Version

Instructions

1. NO STUDENT NAMES! Assign each student an ID number and instruct them to write it at the top of the front page of the assessment. This number can be any number of your choosing.
2. Please ask the children not to make stray marks through bubbles they do not intend to use as their answers. Please eliminate answers using the text instead.
3. DO NOT discuss the answers to any questions until AFTER the POST-assessment. Let your children know they will learn more soon!
4. You may read the questions and answer options to the children as needed, but do not coach them.
5. Once finished, SAVE all tests into one document named using your Project ID number as the document name.

Project ID #

• You will use a unique, 8-digit ID number for all of your forms.

The diagram illustrates the process of creating a Project ID # using a Texas Driver License. It shows a sample driver license for Joan Sample, born 08/12/1983, with DL number 10005422. Red, blue, and green boxes highlight the first 4 digits of the DL (1000), the birth month (08), and the birth day (12) respectively. Arrows point from these boxes to a calculation: 1000 + 08 + 12 = 10000812. The final Project ID # is shown in a black box.
